Do the same work and achieve more ...
Let our technology support your goal for excellence!

Our proven methodology was first applied successfully to correct a failing, multi-billion dollar, US National Security program over 20 years ago. Since then, our technology has led in the ability to recover "mission impossible" situations associated with large, complex government and commercial programs. It's now an easy, intuitive Microsoft Project and Excel add-in, improving execution reliability by 40 to 70%. The table below provides a sample of this technology's value to your goals:

	Current Project Management Technology	*Our Breakthrough Technology - Push Button Simple Automation*
Budget Analysis & Maintenance	• Manual and tedious • Limited support for this goal	• Analyze and determine optimal cost recovery plan when schedule is impacted • Balance budget for all tasks instantly • Define and maintain Gross Margins

Use of Industry Best Practices	• Maybe Earned Value? If so ...
	  – Setup is longer
	  – Maintenance is tedious (may have much higher overhead, more infrastructure and greater costs to sustain)
	  – Limited: No CPI or SPI statistical forecasting and resolution methods
		• Balanced Scorecard analysis and reports
		• Enhanced Earned Value analysis and reports
		• Theory of Constraints analysis and reports
		• Monte Carlo simulation and analysis
		• Kaizen Process Improvement methodology
		• Lean 6 Sigma process thread analysis
		• Predictive Metric analysis and reports
		• Dashboard Leadership Intervention analysis

Workforce Learning & Growth Maintenance	• No support for this goal	• Lessons Learned Journal by sections:
		  – Customers
		  – Business
		  – Teams
		  – Individuals
		• Objective alignment to business goals
		  – Workforce knowledge
		  – Workforce drive

Modeling of Operations	• Tedious separation of FTE work hours and task duration • Excel to Project columns only • Manual task entry	• Separate data entries and tracking of FTE work hours and task duration - it's easy • Excel as data entry interface to Project • Task generation from process templates
Productivity, Efficiency & Quality Control	• Identifies symptoms only • Limited or/to no support for these three control goals	• Identifies core issues • Facilitates mitigation solutions • Creates an optimal implementation plan
Resource Analysis & Maintenance	• Tedious to load, level and maintain • Tedious for matrix organizations	• Rapid load, level and maintain approach • Easy way to share resources from matrix

Incorporates a proven process to increase reliability by 40% to 70%

Lessons Learned Revealed at a Glance

Reveal lessons learned in past projects that result in increased control over meeting current deadlines.

You're losing valuable knowledge stored within your past project plans and it's costing you time, money and quality. Our simple add-in software correlates and statistically analyzes your past tasks using over 200 parameters. It then create a simple dashboard that identifies core issues and solutions to improve your current project reliability by 5 to 10%. Within hours, you'll know solutions to core productivity, efficiency and quality issues with objectivity and certainty. Your past projects contain a wealth of information. Our simple add-in software tool can uncover that knowledge. If it's time to increase control over meeting current deadlines, then we suggest letting your past project plans tell you how.

World Class Business Tools within Minutes

Increase reliability by 40 to 70% by applying world class industry best practices within minutes.

Are you using world class business tools to manage your projects and operations? Our simple software add-in gives you instant access to seven world class business tools that dramatically increases your visibility and control to meet deadlines with 40 to 70% more reliably. Our technology is based on solid metric principles that measure and validate your 40 to 70% improvement with unequaled accuracy. Additionally, our software provides managers an automated, customizable on-the-job training tool to support their team's learning and growth to meet business objectives with greater ease and efficiency. World class business tools and training automation installed within your organization in minutes - that's evolutionary!

Leadership Technology at your Fingertips

Transform your project software into a leadership tool that helps you manage excellence.

We developed a manager's "Rosetta Stone," translating experience, skills and motivation into time, money and quality measurements. What is your financial return on investment for training, quality of life improvements and competency alignment? How does increased motivation precisely translate into specific cost savings and increased business opportunities? How much more can your team increase in productivity, efficiency and quality before they start degrading in performance reliability? If you need to meet business objectives with greater precision, our manager's "Rosetta Stone" is the only tool in the world that gives you a precise cost based translation between your needs and your team's action.
